

HS Internship Description

Tuesday, March 20, 2018 3:39 PM

High School STEM Honors Diploma Program

We are planning a unique 2 week program this summer designed to help four high school students fulfill the *Ohio STEM Honors Diploma requirements. During these 2 weeks, the selected students will be working as a member of an engineering team under the direction of our college intern. Your team's assignment will be a technology-oriented project designed by the intern so it's sure to be interesting and challenging. The project might employ electronics prototyping IoT devices, it could be the development of a chat bot, it could use AI to analyze public data or it could be whatever creative idea our college intern dreams up for you.

This is a great opportunity to learn some new skills and fulfill the STEM Honors Diploma requirement. Additionally, this could be the extracurricular activity on your college application that helps you stand out from the crowd. We only have room for four high school students preferably going into their senior year, if you are interested we want to hear from you; please go to https://www.palittoconsulting.com/STEM_Honors_Diploma to apply. The program will run from July 16th - 27th, Mon - Fri from 8:30 - 4:30 at our downtown Wadsworth facility at 150 S Main St.

This program is sponsored by Palitto Consulting Services, a Technology Consulting company. We specialize in helping businesses make better use of technology and this summer we want to help students in our community learn to make better use of technology too. That's why we've created this program and will be giving our college intern the freedom to design a HS project that is only limited by his or her imagination.

If you'd like to know more about this program, you can see the related college internship description at https://www.palittoconsulting.com/college_internship that explains how the college intern will be responsible for designing, developing and implementing the STEM Honors Diploma Program described above.
